

ABSTRACT OF THE DISCLOSURE

In systems for purchasing products through a network, when purchasers makes a group for purchasing products in bulk, a system is provided that makes it
5 easy for each member of the bulk purchase group and the seller of the products to use the group bulk purchase. For this purpose, when a person makes a request for a group bulk purchase, ID for the group bulk purchase is issued. When the purchase using this ID satisfies a
10 predetermined condition, a special favor is given to each person who has requested the purchase.
